

Mandy's Menagerie CD Booklet Craft Project Guidance

The booklet is divided into two files, side 1 and side 2. If you have a printer that only prints one side at a time, you will need to take the side 1 pages and re-order them and place them back into your printer before printing side 2. (As all printer settings vary, you may need to experiment a bit to produce the correct result.)

When printed correctly, you should have 4 pages with printing on both sides, and the cut lines should line up so that cutting, folding and stapling creates a standard sized CD booklet.
